FT232Drive general edition/FT232 Special driver edition (for Nand repair series)

Open JC Repair assistant, Click right -up corner "Install Driver", WIN7 System Install FT232Drive general edition, WIN8 System Install FT232Drive special edition, Follow the instructions to complete the installation

CH341 driver installation (6-XS Max all series for chip module, JC-V1, JC-B1)

#### **Driver Installation**

PRO1000 Driver Installation (Multi-function PRO1000S) sistant 1.2.00.28 17759463994 -Language -× install Drive FT232 driver general(Nand Repair Devices) Service 28 1-1-1 D・精诚 FT232 drive dedicated .... keji.com CH341 driver(V1/B1/Chip Module) Website and Repair BGA110 Chip Repai **PRO 100** CH341(Reserved)driver me not connec ECID Auto Unlock WiFi Disabled NandSize Auto Ouery Disabled Open JC Repair assistant, Click right -up corner "Install Drivers", choose pro1000/p8/p11 To check the installation successful or Not (there are two ways) Method 1: Click PRO1000 to check the S/N if can show it normally, if it can show it , and it was installed successfully.

Open JC Repair assistant, click Nand repair, Check to check if there is a port number, if it can show Pro 1000 means that installation successfully

Method 2: In the "Nand repair" interface, find "Devmanager", and click to check whether the port number

installed successfully.
